

MEETBIKE - EUROPEAN CONFERENCE ON BICYCLE TRANSPORT AND NETWORKING

INTERDEPENDENCIES OF BICYCLE AND PUBLIC TRANSPORT USE – INTERDEPENDENZEN ZWISCHEN FAHRRAD- UND ÖPNV-NUTZUNG

3RD - 4TH APRIL 2008 | DRESDEN, GERMANY | CITY HALL

PROGRAMME

Conference will be held in English. Simultaneous translation into German will be available on the 2nd day.
Die Konferenzsprache ist Englisch. Am 2. Tag erfolgt eine Simultanübersetzung ins Deutsche.

Welcome to MeetBike!

The City of Dresden, home of the academic centre of traffic and transport sciences in Germany, is looking forward to host this joint conference of the European Union, Intelligent Energy Europe programme, and the German Ministry of Transport, Building and Urban Affairs. Next to professional stimulation, Dresden offers culture, history and beautiful nature to be explored by foot, by bicycle or by public transport.

The MeetBike conference will focus on the exchange and transfer of knowledge and experiences on bicycle networking of European cities and the particular needs of "cities in convergence regions". The event will address practical questions and examples of bicycle promotion and sustainable policies of integrated transport planning.

Special attention is given to the aspect, how bicycle and public transport promotion can work hand in hand in a joint effort to reduce automobile ridership. Also, walking will be included in this alliance. Interesting in this context is the change of travel behaviour: in many countries, habitualised behaviour turns into more co-modal, flexible urban travel patterns. This could be a good chance for rising ridership for bicycle and public transport.

MeetBike will try to install a European network of municipalities for integrated bicycle promotion. It offers a platform to discuss the possibilities and interests of bicycle friendly cities to develop conjoint policies and future EU-projects as partners. This event in Dresden might be the initial point for a new urban bicycle movement initiated by European cities.
